

WATER LOSS 2010

SÃO PAULO - BRAZIL

June 6 to 9, 2010

CALL FOR PAPERS

Authors are invited to present papers relevant to the objectives of the conference, with topics reflecting a wide range of international experiences.

Please submit an extended abstract, in English, of up to 800 words including figures, diagrams or illustrations, in Microsoft Word format, together with the following information:

- Topic
- Title of paper
- Authors names and affiliations
- Contact person's name, email, postal address and telephone

**Abstracts must be received by
30 November, 2009 via e-mail address
committee@waterloss2010.com**

For all other enquiries please contact waterloss2010@acquacon.com.br

EXHIBITION

The conference will host a specialised trade show that will provide an ideal opportunity for companies to promote their services and products relating to all aspects of water-loss management.

Providers and manufacturers of innovative technical solutions related to water losses are invited to exhibit. Participation in the technical exhibition is subject to a fee.

OBJECTIVES OF THE CONFERENCE

Water Loss 2010 is intended to present and discuss the latest developments, strategies, techniques and applications of international best practices in water-loss assessment, management, leakage reduction and control, and improvement of customer metering.

The conference is the sixth event in a series of IWA water-loss reduction speciality conferences. Water Loss 2010 is being brought to the South American Region in order to address the pressing need for improved water utility efficiency in this part of the world.

Topics to be covered are:

- Leakage detection
- Leakage reduction
- IWA strategies for water-loss reduction
- Pressure control
- Leadership issues related to reducing water losses in distribution systems
- Benchmarking water losses
- Management techniques for reducing losses in developed and developing countries
- Training schemes for reducing water losses
- Research into reducing leakage apparent losses
- Management benefits from reducing water losses
